SUMMARY

Zadyrko Tymur

Development and ways of realization of the international investment project in Mexico.

The work provides a general description of Mexico's economy over the past 10-15 years, analyzes the structure of Mexico's economy, provides a description of Mexico's leading industries, examines Mexico's export-import activity, analyzes Mexico's international investment activity, provides an assessment of Mexico's investment attractiveness, and examines Mexico's competitive environment in the field of investment projects (an analysis of the energy market was carried out), the international investment project for the creation of a renewable energy station was substantiated, the economic attractiveness of the investment project was assessed and the expected income was calculated.

Key words: renewable energy, investment climate of Mexico, Mexican economy, investment project in Mexico, import-export of Mexico.

TABLE OF CONTENTS

INTRODUCTION	6
SECTION 1. THE CURRENT STATE OF THE MEXICAN ECONOMY	9
1.1 General characteristics of the Mexican economy over the past 10-15 years	9
1.2 Analysis of the structure of the Mexican economy	13
1.3 Characteristics of leading industries in Mexico	18
SECTION 2. ANALYSIS OF THE INTERNATIONAL ECONOMIC ACTIVITY OF MEXICO	25
2.1 Export-import activity of Mexico	25
2.2 Mexico's international investment activity	29
2.3 Assessment of Mexico's investment attractiveness	33
SECTION 3. DEVELOPMENT OF AN INTERNATIONAL INVESTMENT PROJECT TO CREATE A RENEWABLE ENERGY PRODUCTION STATION IN MEXICO	36
3.1 Research of the competitive environment of Mexico in the field of implementation of investment projects (analysis of the energy market)	36
3.2 Justification of the international investment project to create a renewable energy production station	40
3.3 Assessment of the economic attractiveness of the investment project and calculation of the expected income	43
CONCLUSION AND PROPOSALS	51
